Slight Change to January 2010 Grain Payments

Deshler Farmers Elevator Company offers our grain customers the ability to hold payment for grain that has been sold or grain applied to current contracts until after January 1st of the New Year mainly for the tax purposes of the customer. In the past we have also paid a premium to the customer for the use of the money until it is paid out as long as they signed up to commit to holding the payment until January. This year we will continue to offer this service, but instead of paying an APR as a premium we will pay a per bushel premium based on the commodity and the length of time until January. This year for **corn** and **wheat** we will pay **½ cent (\$0.005) per bushel per month** beginning at the start of the month following the sale or contract applied of the grain. For **soybeans** we will pay **1 cent (\$.01) per bushel per month** beginning at the start of the month following the sale or contract applied of the grain. As in the past you will be required to fill out a January Payment Request Form for the premium to start, but once your payment is set up for January it cannot be paid out early. This change will help take out the confusion on the amount of premium that you will receive if you wish to participate as well as streamline our efficiency in the way we figure your premium.

Thank you for your past and continued support of your co-op,

Mark Sunderman

President/CEO
